CIAME

China International Agricultural Machinery Exhibition
30 October - 1 November 2019
Qingdao/China

The Market

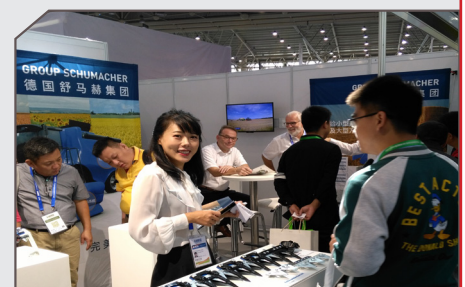

With 135 Mio. ha arable land, accounting for 10% of global arable land China is one of the largest agricultural markets in the world. The majority of arable land is located in mountainous regions managed by small-scale farms that have to provide food to almost one-fifth of mankind. Additionally, about half of the total arable land is arid or semi-arid requiring extensive irrigation. Even though China is TOP 4 of agriculture imports and belongs to the leading manufacturers of agricultural machinery, the level of agricultural mechanisation with 61% is still relatively low. Thus, the Chinese government has set the goal to push the modernisation and mechanisation efforts towards an efficient agriculture in order to become independent from wheat and rice imports.

In view of the growing need of food and the demand of work forces in rural areas Chinese farms particularly look for small-scale, robust and easy-to-use machinery.

The Exhibition

With more than 1,900 exhibitors on 210,000m² exhibit space from 14 countries and 135,000 visitors from 60 countries CIAME is Asia's largest agricultural machinery exhibition. CIAME takes place on the new exhibition center in the Chinese city of Qingdao this year and is organized by CAMDA, the Chinese Agricultural Machinery Distribution Association. The exhibition is the annual meeting point for dealers, manufacturers and importers of agricultural machinery offering an ideal business platform. 90% of all business deals (2014: 400 billion EUR) for agricultural machinery in China are concluded at CIAME every year.
