AgroFarm-IsfahanVET 2018

16th International exhibition for livestock, poultry and dairy

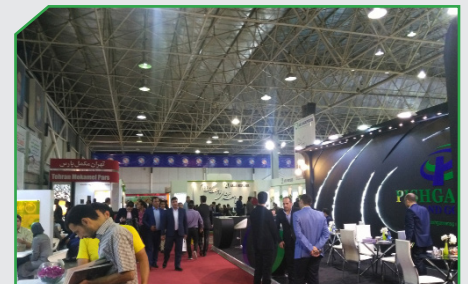

18 - 21 April
Isfahan, Iran

The Market

Agriculture is one of the major sectors of Iran's economy, contributing around 12% to its GDP and employing almost one third of the population. Some half of the rural population is active in agriculture and, domestic production largely (around 90%) covers its food requirements. In 2016, agriculture accounted for more than 13% of Iran's total non-oil exports. On average, one third of agricultural production is attributed to livestock production. The most common species of farm animals are sheep, goats, cattle, buffalo and camels, whereas sheep and goats produce more than half of the red meat. The poultry farm industry has gained considerable growth in the last decade and is currently one of the important meat production sectors of Iran. With nearly 2.3 million tons of output per year, it is the largest in the Middle East, ranked 8th in Asia and 18th in the world.

Due to climatic conditions such as water scarcity or soil salinity, as well as the backlog of investment in modern technology, the government of Iran faces a number of challenges in increasing the efficiency of livestock and poultry output. Approximately 30% of Iran's total surface area is suitable for agriculture but only about 10% is under cultivation. This entails a shortage of land for production of animal feed and, therefore, makes Iran highly dependent on import of feedstuff. For example, livestock corn (\$874 million), soybeans (\$593 million) and soymeal and soy press cake (\$381 million) were among the main imported agricultural products in 2016. Moreover, the government is looking to increase the production value by implementing modern processing technologies as well as technologies for improving feed efficiency and animal productivity.

The Exhibition

AgroFarm-IsfahanVET 2018 is the 16th international exhibition for livestock, poultry and dairy, which will take place from April 18 to 21, 2018 in Isfahan, the capital of Isfahan Province. In 2017, as many as 142 exhibitors presented their latest technologies in animal husbandry to over 10,000 visitors from all over Iran and foreign countries. DLG International organizes AgroFarm-IsfahanVET in partnership with Isfahan International Exhibitions Co. The German Agricultural Society (DLG) will organize a professional conference program involving high-ranking international experts.

Main Topics

Animal housing • Cattle and poultry breeding • Feed production and storage
• Feed additives and ingredients • Veterinary medicine • Manure handling and treatment • Milk and meat processing • Storage and cooling • Others

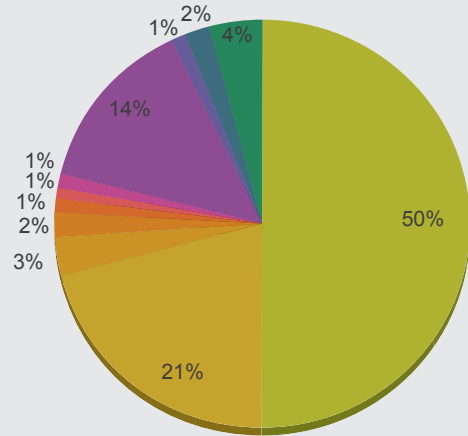

AgroFarm-IsfahanVET 2018

16th International exhibition for livestock, poultry and dairy

18 - 21 April
Isfahan, Iran

Visitors 2017

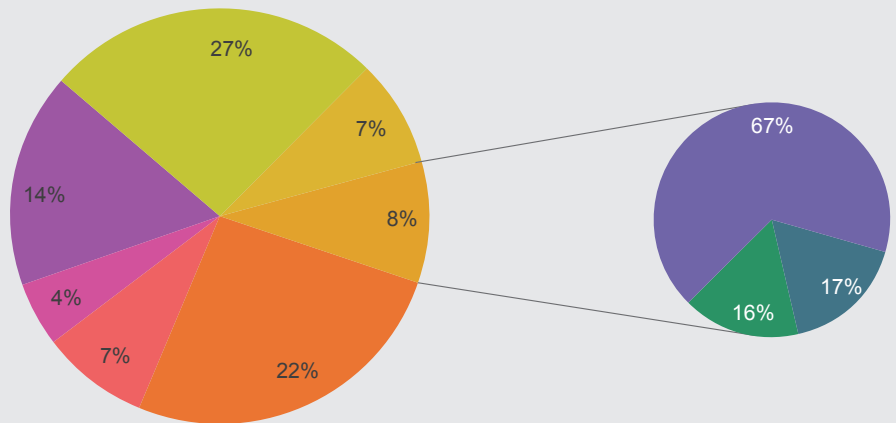

- Dairy Farmers
- Poultry Farmers
- Veterinary Pharmaceutical
- Feed Industry
- Poultry and Livestock Breeding Equipment
- Genetics and Breeding
- Veterinary Labs and Clinics
- Universities, Higher-Education Institution
- Beekeepers and Honey Producers
- Dealers
- Other

Number of visitors: 10,500

Exhibitors 2017

- Animal Husbandry Equipment
- Breeding and Genetics
- Union & Media
- Livestock Importer
- Broiler chicken
- Feed Industry
- Poultry Equipment
- Poult & Husbandry Enqupiment
- Pharmaceutical

Number of exhibitors: 142 +23%

DLG Conference 2017

DAY 1

Actual challenges in Poultry Health

Professor Dr. Michael Hess,
University of Veterinary Medicine Vienna, Austria

Poultry Red mite, A big challenge in modern poultry today

Farhad Mozafar,
Technical Service Coordinator, Lohmann Tierzucht, Iran

The essential first week-practical experience with broiler fattening in Germany

Stefan Teepker,
Broiler Farmer, Germany

Modern layer and new looks in feeding

Dr. Zahed Abbasi,
Production Manager, Toyoor Barekat Co., Iran

DAY 2

Milk production in North Western Europe and the world: analysis of Profitability, status and prospects

Dieter Mirbach,
DLG e.V.

Claw health and functional hoof trimming in Dairy Herds

Dr. med. vet. Hans Peter Klindworth, Germany
Veterinary Specialist in Cattle

Modern Dairy cattle breeds - fit for milk production worldwide

Hajo Gehlenborg,
Export Manager - German Genetics International

AgroFarm-IsfahanVET 2018

16th International exhibition for livestock, poultry and dairy

18 - 21 April
Isfahan, Iran

Exhibitors 2017 (selected)

Ata-Fen Veteriner
