Food Industry/ Prodmash.Holod.Upak

June 5 - 9, 2018
Minsk, Belarus

The Country

The Republic of Belarus is situated at the Eastern border of the EU adjacent to the markets in Russia and Ukraine. With its 9.3 million inhabitants the prospering country has an ideal geographic position as a unique link between Western and Eastern economic regions. A good developed infrastructure and the remarkable economic strength compared to other CIS states make Belarus an attractive business partner. With the Customs union between Belarus, Russia and Kazakhstan, which came into effect on July 1st, 2010, the trading volume between Belarus and the members of the Customs union has risen significantly. In particular, it produced a strong impulse for the Belarusian export to Russia. Together with the government's measures for privatization and liberalization of the investment and business climate, great opportunities for foreign companies open up.

The Market

The modernization of food industry in Belarus is under way. Existing technologies for food processing are out-of-date the country requires new solutions in order to improve the processing and transportation of domestic farm products. The Belarusian market provides excellent opportunities for companies which offer all-in-one solutions: from producing up to packaging.

Tourism, hotel and restaurant industry are being modernized too. According to the direct contribution of tourism and hotel industry to GDP, Belarus belongs to the Top 10 of the fastest growing economies worldwide. However, the country is still in need of hotels, restaurants, road side restaurants, camping sites and youth hostels.

The Exhibition

The international exhibition Food Industry/ Prodmash.Holod.Upak includes such topics as food processing and transportation as well as packaging and storage of food products and beverages.

Our experience is your profit!
