KazAgro/KazFarm 2019

10th International exhibition for agricultural machinery, plant production and animal husbandry

October 23 - 25

The Market

Having the 9th largest territory in the world (2,7 million square kilometers), Kazakhstan's agricultural potential, which has not been used to its full potential, still remains enormous. There is an increasing demand for modern agricultural machinery and equipment, a know-how as well as effective irrigation technologies. In response to an increasing shortage of water in the country, it is planned to invest around 2 billion USD for implementing irrigation systems, water tanks and wells until 2021.

Other measures that the government plans to implement by 2021 include import substitution, diversification of crops, subsidies for small and medium-sized enterprises and incentives to cooperate with cooperatives and export subsidies. The aim, among others, is to increase exports and achieve self-employment in the country by raising agricultural production in the local market. It is also planned to diversify agricultural products in order to promote soil fertility, develop new value chains and have a positive impact on yield and price fluctuations. The aim here is the cultivation of fodder plants, oil crops (sunflower, soybean) and grain legumes (peas, lentils).

Small businesses and households will be increasingly subsidized in the future in order to increase production with modern technology and know-how. So far, mainly large enterprises benefited from subsidies.

International manufacturers of agricultural machinery, irrigation systems, and animal husbandry equipment and products are benefiting from rising demand in Kazakhstan.

The Exhibition

At KazAgro/KazFarm 2018, 300 international companies exhibited the latest agricultural machineries and equipment, farming and livestock raising as well as food processing Technologies to almost 10,000 professional visitors. The participation of companies from more than 32 countries, including national stands from Germany, Qatar and Canada underscored the show's international character.

The event is supported by the Kazakh Ministry of Agriculture and the German agricultural machinery association VDMA and the German Federal Ministry of Food and Agriculture.

10th International exhibition for agricultural machinery, plant production and animal husbandry

October 23 - 25

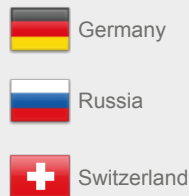

Highlights 2018

EXHIBITORS

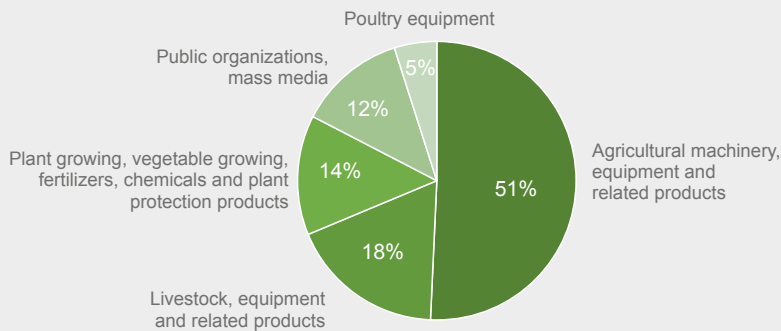

Country representation

National pavilions:

Product category

Main topics

KazAgro

- Agricultural machinery and inputs
- Tractors and trailers
- Logistic and transportation
- Harvesting and post-harvest equipment
- Fertilizers, sprayers and spreaders
- Irrigation technology, pumps
- Plant protection, fertilizers and additives
- Components and spare parts
- Horticulture equipment and technology
- Greenhouses, equipment and supply
- Cooling and cold storage
- Grain processing and storage
- Plant breeding, seeds

KazFarm

- Animal housing
- Cattle and poultry breeding
- Feed production and storage
- Feed additives and ingredients
- Veterinary medicine
- Manure handling and treatment
- Milk and meat processing
- Storage and cooling

Official support

- Ministry of Agriculture of the Republic of Kazakhstan
- KAZAGRO National Holding JSC
- Federal Ministry of Food and Agriculture of Germany (BMEL)
- VDMA e. V. (Mechanical Engineering Industry Association)
- Nur-Sultan City Administration
