# Meat Industry/ AgroProdMash 2017

October 9-13, Expocentre Moscow

## The Market

The Russian food industry still offers a big potential for international manufacturers of equipment and machinery for food processing. Due to the import ban on food products Russia urgently needs to compensate for the lack of food products by developing a competitive food processing industry. The Russian government, thus, has adopted an investment program planning to erect more than 400 projects in the fields of dairy industry, fruit processing as well as pig and poultry breeding.

## The Exhibition

AgroProdMash is officially Russia's best food-processing trade show, by virtue of the testing organisation RussCom IT, regarding the number of exhibitors, amount of exhibition space, number of visitors, and number of countries represented. Since 1996, AgroProdMash has provided manufacturers and distributors of food and packaging machinery with the opportunity to do business under one roof. Last year 732 companies participated at this event. Trade visitors not only come from across Russia but also from all countries of the former Soviet Union (FSU). As in the past years, German manufacturers will be exhibiting at a joint German stand at this year's Meat Industry, which takes place in the frame of AgroProdMash.

## Main Topics

Food processing technologies and equipment • Bakery and sweets technologies • Fruit and vegetable processing • Labelling machinery • Packaging machinery • Storage equipment • Beverage technologies • Ingredients and food additives • Industrial refrigeration • Transport and logistics • Industrial hygiene
