Agro Animal Show / Grain Tech Expo / Fruit.Vegetables.Logistics 15-17 February 2017

International Specialised Exhibition of Livestock
and Processing of Fruits, Vegetables and Grain

The Market

With 63.8 m tons of grain Ukraine attained a record harvest in 2015/16 again and also the exports reached with 39,4 m tons a new record height. Agriculture has always been one of the major sectors of the Ukrainian economy - its share of the GDP amounted to 14% in 2015 and for the first time after 2013 Ukraine doubled the imports of agricultural machinery in the first half of 2016 as compared to 2015.

However, due to the shortage of state-of-the-art equipment experts estimate that 5-6 m. tons are lost annually. The insufficient equipment of the industrial plants also affects the average yields in grain, sun flowers, rapeseed, sugar beets and potatoes with results way below the Western European level. The industry is still in need of modern equipment. This is also true for seeds: Ukrainian farmers have recognized the significance of high quality seeds leading to more and more imports of seeds.

Livestock in Ukraine has been gaining more and more importance. The poultry sector driven by exports has been rapidly developing, especially since 2013, when Ukraine has started to export poultry and egg products in the EU. In 2015, the exports of the poultry products amounted to 162,000 tons. Also, the dairy producers have been given new perspectives as the first permits for export to the EU and China have been granted in 2016.

Fruits and vegetables

Due the fertile black soil and favorable climatic conditions production of fruits and vegetables in Ukraine, especially in its southern regions, provides a high potential. Ukraine belongs to the Top 5 of the European apple producers and to the Top 10 of the most important producers of grapes and wine in Europe. In 2016, European importers' demand for Ukrainian tomatoes grew rapidly – the total exports amounted to 17,100 tons from January-August 2016, 2.2 times as high as a year ago and the highest result ever.

The Exhibition

Agro Animal Show /Grain Tech Expo /Fruits.Vegetables.Logistics is the most important platform for animal husbandry and agricultural technology in Ukraine. At the last edition 514 companies from 19 countries showcased their complete range of state-of-the art solutions for animal husbandry and agricultural technologies to 17,000 business professionals.

Main Topics

Animal housing construction, husbandry technologies; grain processing, feed production, forage production, transport & storage solutions; breeding technologies, genetics; milking, cooling technologies; biomass utilisation; auxiliary equipment, devices, instruments; plant growing and agricultural chemistry.

Our experience is your profit!

Agro Animal Show / Grain Tech Expo / Fruit.Vegetables.Logistics 15-17 February 2017

International Specialised Exhibition of Livestock
and Processing of Fruits, Vegetables and Grain

Prices

Participation Fees

179 € per sqm hall space

72 € per sqm standard stand construction

Surcharge for location

- Corner stand (2 sides open): 10 %
- Peninsula (3 sides open): 15 %
- Island (4 sides open): 20 %

Registration Fee

360 € per exhibitor/sub-exhibitor

Registration deadline: December 12, 2016

Our Service

- individual personal support before and during the exhibition
- extensive consulting for stand construction
- support by our experienced partners regarding transport, customs clearance and travel
- IFWexpo service office at the exhibition
- free admission tickets for your clients
- extensive advertising regarding the exhibition
