Agrarians, industrial and amateur beekeepers have finally got the chance to evaluate comprehensively achievements of both Ukrainian and foreign exhibitors, to buy all they need for their apiaries and to visit the large-scale conference **«Productive beekeeping in Ukraine. Export potential, strategic development directions»** held on October 29.

Topics that were discussed at the conference:

- 1 Problems of beekeeping industry.
- 2 Management in beekeeping industry.
- 3 Anti-bacterial properties of Ukrainian honey.
- 4 German experience for Ukrainian beekeepers: Senior Experten Service and Import Promotion Desk.
- 5 Current situation on the Ukrainian honey market. Presentation and positioning of the brand "Ukrainian honey".
- 6 Ukrainian wax as a global brand.
- 7 Regulations for application of plant protection means. Reasons and consequences of bees' dying from pesticides.
- 8 Example of positive and productive cooperation between agricultural producers and beekeepers.
- 9 Prospects and results of implementation and work of the notification system "GRAND EXPERT".
- 10 Use of modern technologies in beekeeping in Finland.
- 11 How to sell honey? Modern methods of selling for Ukrainian beekeepers.
- 12 Suspension "Alive Chlorella" in beekeeping. Increase of quality of bee families by means of providing them with protein feeds during early spring and autumn periods.
- 13 Ecologically safe revitalization of bees in cases of parasitic and infectious diseases.
- 14 EM technology in beekeeping.
- 15 Presentation of the project "Healthy bee is a healthy planet".

Beekeeping is an integral part of agriculture!

A considerable increase of yields of insect pollinated crops in recent years vividly proves it. Visit to the exhibition "Productive beekeeping" will allow buying everything one needs for his apiaries, learning about the state of the industry at the large-scale conference and summarizing results of the season together with like-minded people.

See you in 2020 at the exhibition
"Productive beekeeping"!
