## AGRI ASIA 2021

3 - 5 September 2021, Mahatma Mandir,  
Gandhinagar, Gujarat, India

### The Exhibition

AgriAsia, held once a year, is one of the leading international agricultural events showcasing international agriculture technologies in India. More than 250 companies from India and overseas did participate in this year's exhibition. The exhibition took most of 15,000 square meter exhibition space at the Mahatma Mandir Memorial Center.

Agri Asia 2019 has been visited by approx. 100,000+ visitors from entire India and abroad. The event is designed for farmers, agriculture business representatives, agronomists, associations, biotechnologists, government employees.

### Highlights 2019

EXHIBITORS

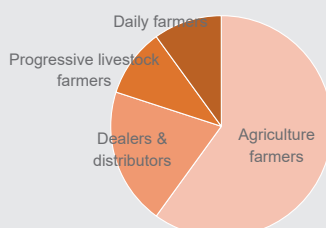

#### Participating countries

VISITORS

#### Visitors by field of activity

### Exhibitor profile

- Agri Ecology
- Agricultural Building Contractors
- Agricultural Machinery & Equipment
- Agro and Food Processing
- Aquaculture
- Biotechnology
- Fertilizers & Chemicals
- Floriculture
- Fork lift & Handling Equipment
- Greenhouses
- Horticulture
- Irrigation and Water Technologies
- Livestock & Dairy Farming
- Marketing & Export / Import Services
- Organic Agriculture
- Plant Protection
- Plasticulture
- Post Harvest Treatment
- Poultry
- Precise Agriculture
- R & D
- Renewable Energy
- Rural Development
- Seeds, Nurseries & Plant Propagation Materials
- Small Ruminants
- Software & Hardware
- Veterinary
- Turnkey Projects & Knowledge
- Transfer

### Visitor profile

- Farmers
- Agents & Distributors
- Farm Contractors
- Bankers, Educationist & Students
- Govt Authorities
- Importers & Exporters
- Trade Industry & Trade Media
- Investors & Entrepreneurs
- Consultants
- Scientists & Technologists
- Transport & Logistic Experts
- Dairy
- Poultry & Livestock Farmers
- Veterinary Practitioners

## The Market

With a population second only to China and the **second largest agricultural land-bank** - 157.35 million hectares, the Indian market remains still largely ignored by many foreign producers of agricultural technology and supplies. The scale of the Indian agriculture industry is enormous – it produces annually about 161 million tonnes of agricultural products, has 20 agri-climatic regions, which encompasses all 15 major climate zones as well as possesses 46 out of 60 main soil types that exist worldwide. About 58 per cent of India's population depend on agriculture as a primary source of income.

**India is the world's largest producer of spices, pulses, milk, tea, cashew and jute** and the **2nd largest producer of wheat, rice, fruits and vegetables, sugarcane, cotton and oilseeds**. It also ranks 2nd in global production of fruits and vegetables and is a leading exporter of mangoes and bananas. The country also exports grapes in large quantity across the world.

Despite the fact that the Indian agro industry is largely supplied by the domestic companies, many new opportunities exist for foreign companies, especially, producers of modern technology and inputs. Due to limited availability of arable land against growing population, **huge opportunities exist for inputs like seeds and plant growth nutrients**. In India, commercial seeds only account for minor percentage (25 per cent) of sales and huge demand is expected for quality branded seeds. Given that India wants to establish herself as a global food processing hub, there is a high demand for cold storage capacity, modern warehouses as well as food processing parks. The Indian government aims to provide financial and policy support using numerous government and private funds. In addition, there are new state and regional government initiatives on boosting the horticulture sector.

So far, the mechanization level of Indian agricultural sector meant mostly "tractorization" usually tractors with 30-horsepower engine. The second wave of mechanization is under way starting in highly competitive sectors such as potato growing. Indian producers are also looking for irrigation technologies, small-sized tractors and narrow soil-working machinery.

## Agriculture in Gujarat

- Diversified crops and cropping patterns
- Climatic diversities – 8 agriculture climatic zones
- Strong agricultural research capabilities
- Four agricultural universities
- Emerging contract farming opportunities
- Strong agriculture marketing infrastructure: APMCs, market yard, cold storages, processing units, services and business centres
- Increasing adoption of hi-tech agriculture technologies like tissue culture, green houses and shed-net houses leading to higher yield and production
- A VSAT based real time multi commodity exchange at Ahmedabad
- Agriculture export zones: mango and vegetables, onion, sesame
- Upcoming critical infrastructure: perishable cargo complex, banana pack house, port-based agriculture cargo handling logistic hub, vapour heat treatment (VHT) with integrated pack house.

### Major Agricultural Crops:

Bajra, Groundnut, Cotton, Rice, Maize, Wheat, Mustard, Sesame, Pigeon pea, Green gram and Sugarcane

### Major Horticulture Crops:

Mango, Banana, Sapota, Lime, Guava, Tomato, Potato, Onion, Cumin, Garlic, Isabgol and Fennel
