Canadian Dairy XPO

05 - 06 April 2023

Stratford, Ontario, Canada

The Market

The agri-food sector plays an important role in Canada's economy: in 2021 both sectors together generated approx. 6.3% of Canada's GDP and employed 2.1 million people.

Canada is one of the largest food exporters in the world and is planning to increase food exports, relying on high-quality and ecologically produced food and digitalization.

While large arable farms can be found in the center of Canada, in the provinces of Ontario and Québec the focus is on animal husbandry and thus on fodder production. There are smaller farms with an average of 70 to 80 cows. Canada's dairy industry benefits greatly from stable milk prices, which are kept at a high level through supply management.

The Exhibition

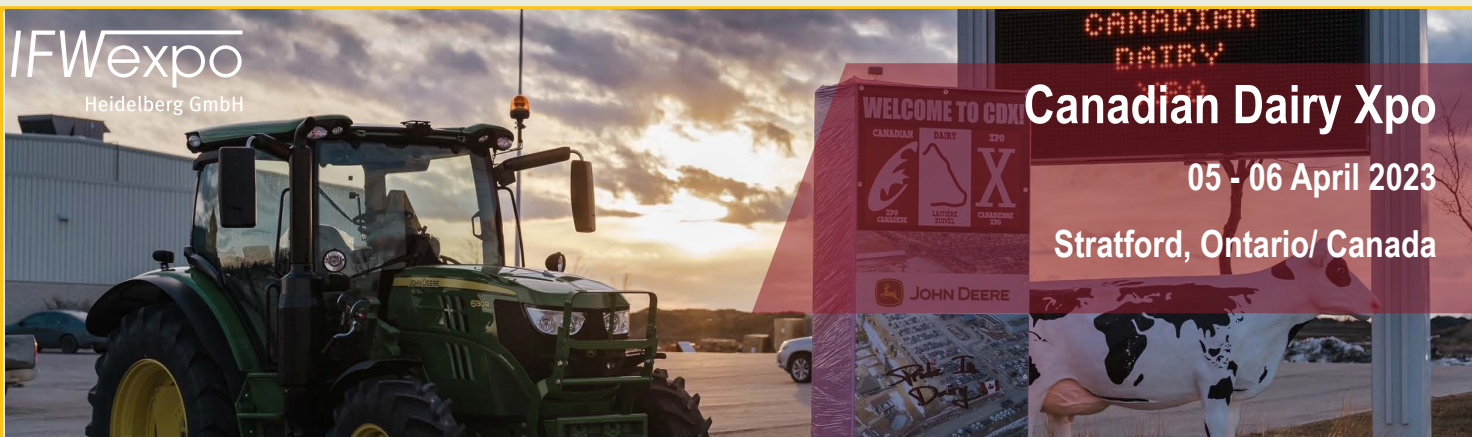

As the largest Canadian trade show for dairy industry, Canadian Dairy XPO has been held in Stratford, Ontario – in the heart of the dairy industry – for the past 9 years. More than 350 companies from 35 countries present their innovative techniques and technologies to 17,000 visitors. The 100km radius from Stratford is home to the highest concentration of dairy farms in the country – the largest dairy audience comes from this region.

The German Federal Ministry of Food and Agriculture supports German companies, their subsidiaries and dealers with a German Pavilion at the trade fair.

Take your chance and meet top Canadian industry decision-makers at Canadian Dairy XPO!

Benefit from our experience!
