The market

With a population of around 34 million, Uzbekistan is **the most populous country in Central Asia** and one of the region's fastest-growing markets. Agriculture remains a cornerstone of the economy, contributing around one quarter of GDP and playing a key role in employment and regional development.

Due to arid climatic conditions, **over 85% of agricultural land is irrigated**, making efficient water management essential. While cotton and wheat remain important, Uzbekistan is actively diversifying into fruit, vegetable, and livestock production.

The country produces **over 20 million tons of fruits and vegetables** annually, yet only 10–15% is processed domestically. Limited cold storage capacity of around 1 million tons allows storage of just about 5% of the harvest, driving strong demand for processing equipment, packaging, refrigeration, and cold chain technologies.

Animal husbandry accounts for **around 40% of agricultural output**, with nearly 95% of livestock raised by private farms, which supply the majority of meat, milk, and eggs. This creates growing demand for modern feeding systems, breeding technologies, housing, and animal health solutions.

The exhibition

AgroExpo Uzbekistan / Agrotech Expo 2026 will take place from **25 to 27 November** at the Uzexpocentre in Tashkent. The exhibition has established itself as a key professional platform for Uzbekistan's agricultural sector, bringing together farmers, agribusiness representatives, technology suppliers, and public authorities. It serves as a unique meeting point for stakeholders from across Central Asia and international manufacturers of investment-grade machinery, equipment, and technologies for crop production, horticulture, and animal husbandry.

The exhibition is complemented by a strong professional program. More than **8 specialized conferences** and business events with international speakers and industry experts addressed key topics such as innovation, productivity growth, and export development. The event attracted representatives of ministries, government agencies, and sectoral associations from all regions of Uzbekistan, as well as VIP delegations, key buyers, and leading agricultural and food-processing companies, highlighting its strategic importance for the sector.

The exhibition was officially visited by the Minister of Agriculture of Uzbekistan, **Ibrokhim Abdurakhmonov**, and the Minister of Agriculture of Poland, **Stefan Krajewski**, underlining its significance for international cooperation in the agricultural sector.

In 2025, the exhibition was held across two halls and an expanded outdoor area, welcoming nearly **6,800 professional visitors**. The gross **exhibition area reached 15,800 m²**, hosting over **180 exhibitors from 20 countries**, with official national pavilions from Germany, Poland, Austria, and Iran.

A particularly notable feature is the strong international character of the exhibition: **around 70% of exhibitors were international companies**, while farmers and agribusinesses from all regions of Uzbekistan actively participated. As a result, AgroExpo Uzbekistan / Agrotech Expo is widely recognized as the only truly international agricultural exhibition in Uzbekistan, providing an effective platform for knowledge exchange, innovation transfer, and international business development.

Benefit from our experience!

AGROEXPO UZBEKISTAN/ AGROTECH EXPO 2026

International exhibition for Agricultural Technology,
Animal Husbandry and Horticulture

Highlights 2025

Exhibitors

Exhibitors from 20 Countries:

Visitors from more than 22 countries:

Visitors from 14 regions:

1. Tashkent
2. Andijan Region
3. Bukhara Region
4. Fergana Region
5. Jizzakh Region
6. Namangan Region
7. Navoiy Region
8. Qashqadaryo Region
9. Samarkand Region
10. Sirdaryo Region
11. Surxondaryo Region
12. Tashkent Region
13. Xorazm Region
14. Republic of Karakalpakstan

Visitors

Focus

AGRICULTURE

- Agricultural machinery and equipment
- Tractors and trailers
- Transport and logistics
- Harvesting and post-harvest equipment
- Components and spare parts

PLANT PRODUCTION

- Fertilizers, sprayers and spreaders
- Irrigation technology, pumps
- Plant protection, fertilizers and additives
- Plant breeding, seeds
- Grain processing and storage

ANIMAL HUSBANDRY

- Animal housing
- Cattle and poultry breeding
- Feed production and storage
- Feed additives and ingredients
- Veterinary medicine
- Manure handling and treatment
- Milk and meat processing
- Storage and cooling

HORTICULTURE

- Horticulture equipment and technology
- Greenhouses, equipment and supply
- Cooling and cold storage

Visitor profile

- Representatives of agricultural state institutions
- Industrial agriculture experts
- Owners of agricultural enterprises, livestock farms and flour mills
- Owners of greenhouses
- Managers and specialists from enterprises involved in the production of meat, dairy and canned products
- Farmers
- Distributors of agricultural products
- Press
